

Vancouver Bench

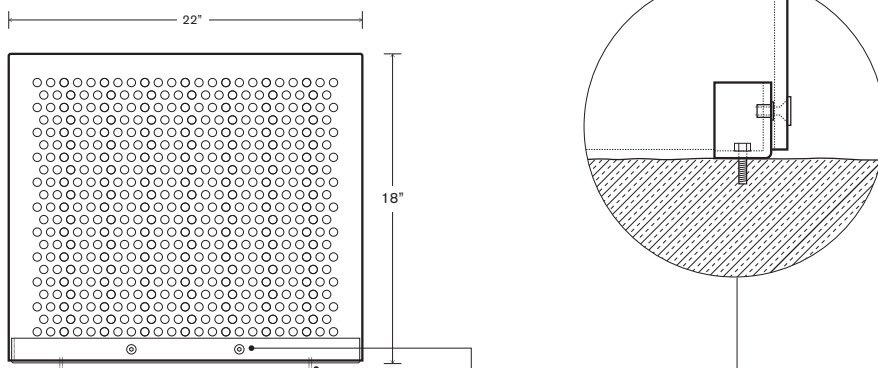

Vancouver Bench

COLLECT

Designed in collaboration with LM Studio and Studio Block. Vancouver Bench is available through our Collect line of site furnishings and is the first of our line of collaborative seating inspired by the cities we love.

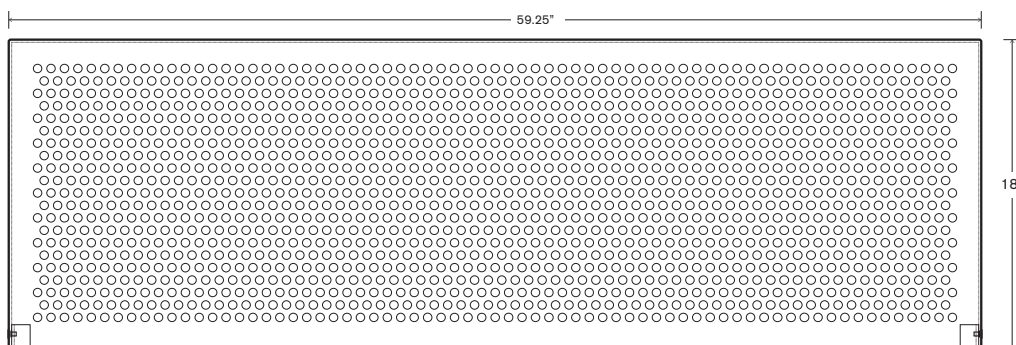

A line of outdoor site furnishings that take a design forward approach, Collect is a collaborative journey with designers around the world in an effort to take an authentic look at the way we use and share space outdoors. Our destination, a landscape where culture in part is shaped by design – driven and informed by collective and global partnerships who's aim is to realize beautiful, durable and environmentally considerate objects we're all eager to gather around.

Side View

Foot fastens to concrete with .25" anchor bolts and assembles to bench form with two stainless or anodized fasteners on bench side.

Front View

Vancouver Bench is a stand alone seating form perfectly suited for outdoor use. Constructed with weather in mind, this bench fits into a modern outdoor setting subject to rain and snow. Constructed from powder coated marine grade aluminum, it is available in a unique palette of colors as well as clear-coated aluminum.

- Bench form constructed of powder coated .188" aluminum
- Perforated pattern allows drainage and low unit weight
- Mounting feet constructed of 0.25" aluminum
- Stainless or Anodized Fasteners
